Art Unit: 1712

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Roberta Pelletier on August 22, 2005.

The application has been amended as follows:

In claim 1,please replace the phrase "wherein the poly(arylene ether) is purified prior to the combining, the mixture is purified, or a combination of the foregoing" with

-- wherein the mixture is optionally purified --

In claim 78, please replace the phrase "wherein the poly(arylene ether) prior to combining, the poly(alkenyl aromatic) prior to combining, the poly(alkenyl aromatic) prior to combining, the mixture, or a combination of the foregoing is purified;" with

-- wherein, prior to combining, the poly(arylene ether), the poly(alkenyl aromatic), or both are purified

and/or

the mixture is purified subsequent to combining --.

Art Unit: 1712

In claim 107, please replace the phrase "wherein the poly(alkenyl aromatic) prior to combining, the mixture, or a combination of the foregoing is purified" with

-- wherein the poly(alkenyl aromatic) is purified prior to combining and/or the mixture is purified subsequent to combining --.

The following amendments were deemed necessary by the Examiner to deconvolute the numerous concepts presented by the aforementioned phrases and, further, to explicitly delineate when the different manipulations were to be carried out.

Applicant has amended claim 63 so that it now requires that one or more of the manipulations set forth therein is performed in an inert atmosphere which for the purposes of examination, has been taken to mean an atmosphere that will not bring about a chemical change in the polymeric materials, and is devoid of particles that would add an impurity to the mixture. Applicant is indeed correct that the reference cited in this prosecution does not mention this aspect nor is it clear from the related prior art that such drastic measures are needed. (It is appreciated that such a measure would clearly bring even greater reductions in the number of impurities present in the polymer mixture and, hence, the optical article derived therefrom but it is also disadvantageous from an economic perspective and the prior art doesn't indicate that the levels of purity targeted by Applicant are necessary, or even desirable, for manufacturing optical articles.

Art Unit: 1712

As for claim 1, the prior art teaches in numerous documents that residual catalyst may be removed from polyarylene ether by employing aqueous wash solutions of chelating materials. However, this is not disclosed in the context of a more expansive method of purifying mixtures or polyarylene ether and poly(alkenyl aromatic) and it is believed that more than this operation is required to obtain a mixture having the degree of purity mandated by the claim.

The other claims are allowable for reasons made of record, i.e that specific elements of the mixing apparatus are not disclosed nor is it clear that they could be incorporated therein in concert with the other elements required of the apparatus disclosed by *Moritani*, e.g. the sintered filter installed in the end part of the screw barrel.

For all of these reasons, claims 1-3, 7-16, 18-24, 26-64, 68-69, 71-74, and 77-112 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone
